DETAILED ACTION

Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 3 are, drawn to a plurality of peptides, classified in class 530, subclass 300.
 - II. Claim 2 is, drawn to a plurality of polynucleotides, classified in class 536, subclass 23.1.
 - III. Claims 4-11 are, drawn to a method of inhibiting microbial growth *invitro*, classified in class 435, subclass 32.
 - IV. Claims 12, 20-25 are, drawn to a method of inhibiting microbial growth *invivo*, classified in class 424, subclass 9.1.
 - V. Claims 13-19 are, drawn to a method of inhibiting the growth of drug resistant microbial strains, classified in class 435, subclass 4.
 - VI. Claims 26-31 are, drawn to a kit, classified in class 514, subclass 12.

2. The inventions are distinct, each from the other because of the following reasons:

Groups I- II and VI are drawn to structurally and functionally distinct products. The inventions are shown to be distinct because they are drawn to distinct products made by different methods and they are physically and functionally distinct molecules.

Groups III-V are drawn to different methods. The inventions are shown to be distinct because they are drawn to distinct methods, which differ in method objectives, method steps, reagents and material used.

Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the peptides of group I can be used for immunoassays.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and also requires independent searches restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
